**Re: Expanding the Economic and Innovation Opportunities of Spectrum through  
Incentive Auctions, Docket No. 12-268**

On September 16, 2013, T-Mobile and Verizon jointly submitted a letter to the Commission urging the Commission to adopt a 35x35 MHz “down from channel 51” Frequency Division Duplexing band plan for the 600 MHz incentive auction. This letter included as an attachment two slides depicting the proposed band plan that erroneously labeled the guard band at channels 47 and 48 as a 9 MHz guard band in the 11, 12, and 13 Channel clearing scenarios. In fact, the guard band should have been described as being 10 MHz wide.

A correctly labeled slide presentation is included as an attachment to this letter. Please contact me with any questions. Consistent with section 1.1206 of the Commission’s rules, please associate this letter with the above-referenced docket.

Respectfully submitted,

*/s/ Trey Hanbury*
